

Recruitment Stories

Many students after their graduation struggle to get a job. So, I want to share various recruitment stories in order for them to have an idea about what to prepare for and how to prepare for a job. This form is a medium to collect information from various employees in different companies which I will then add in my personal blog. Any help is really appreciated.

Tell us a bit about yourself and your background.

Hi, I am Sumonta Saha Mridul, a student of the Department of Software Engineering at SUST, currently residing in Narayanganj.

My academic journey has been diverse and rewarding. In my 1st year, I learned C and C++ and began solving competitive programming problems on platforms like [Codeforces](#) and [CodeChef](#). During my 2nd year, I switched to java, started building some java games and android apps. At the start of my 3rd year, I jumped into web development, learning HTML, CSS, and JavaScript, which eventually led to my transition to Full-Stack Web Development, specializing in React, Node.js, Express.js, and MySQL.

My passion for building projects grew stronger, and I actively participated in development competitions, hackathons, and project showcases. Notable achievements include ranking in the top 10 at the DU IIT API Hackathon, securing 2nd place at the BUP Project Showcasing competition, and finishing in the top 5 at the ICT Division Idea Competition and top 10 in Sust SWE [Technovent](#) Hackathon.

I set my sights on the prestigious Code Samurai 2024 hackathon, where my team excelled, achieving 2nd place in the second preliminary round and making it to the finals out of 400+ competing teams.

I have built numerous projects, meticulously documenting them on GitHub. Outside academics, I enjoy playing games with friends at night, blending productivity with recreation.

Currently I joined Cefalo as Trainee Internship Software Engineer as part of my internship journey
